THE IMPORTANCE OF INTERACTIVE TEACHING METHODS

Annotation: This article is about the importance of interactive teaching methods of English. Such methods and technologies brighten and quicken the reaction of the students to act. The variety of delivering of lessons encourages the students to reveal their abilities, which were hidden before.

Key words: language teaching methods, communicative language teaching, direct method, interactive, natural app

A teaching method is formed in the teaching process through the interaction between the teacher and learner. Within the existing learning conditions, the learning process is considered as an interaction between the teacher and student, aiming to transfer common knowledge, skills, and values to the student.

An interactive approach involves interaction in dialogue mode ("inter" - reciprocally, "act" - do, perform). In other words, an interactive teaching method is a form of learning and communicative activity in which students are involved in the learning process and reflect on what they know and what they are thinking.

Unlike a traditional teaching method oriented on the teacher whose main function is to assist learners and facilitate, interactive learning focuses on students' needs, abilities, interests.

Interactive method

Among widely spread and popular interactive approaches, we can single out the following:

1. Creative tasks;
2. Games (role-plays, imitations, business and development games);
3. Use of human resources (excursions, inviting experts);
4. Social Projects;
5. Use of new material (interactive lectures, video-audio materials, student in the role of a "teacher", Socratic dialogue, asking questions);
6. Solving tasks (associative maps, brain storming, case analysis).

Practice proves that using the above-mentioned interactive methods helps to achieve the results of modern education. They help learning process to be conducted in such a way that all students are equally involved in the cognitive process, each individual contributes to the teaching process, students exchange information and ideas.

Interactive brainstorming is typically performed in group sessions. The process is useful for generating creative thoughts and ideas. Brainstorming helps students learn to pull together. Types of interactive brainstorming include:

- Structured and unstructured;
- Nominal group relationships;
- Online interaction such as chat, forums and email;
- Team-idea mapping;
- Group passing;
- Individual brainstorming.

The main thing about them is to create favourable conditions to use them skillfully during the lesson because they make any lesson more interesting and fruitful.

These technologies have been developed and perfected during the years that is why they can be used in all types of lesson.

As a conclusion Interactive methods in multicultural education allow students to have not only knowledge and compassion for others but also be able to make rational decisions in any situation in order to develop the most acceptable models of thinking, action, and communication.
